

IronTech Group: Manufactured and designed in Girona, Spain.

IronTech is a company group with a team with more than 15 years experience with headquarters in Girona.

Our target is to offer the best solutions in industrial equipment based on the design and manufacture of the models, as well as the integration of the electronic elements and next generation hardware platforms aiming to have an innovative, powerful, flexible and stable product, constantly evolving with the need of the current market.

Our range of products has been designed with selected components to offer an outstanding performance continuously running along all its life cycle. Thank to our experience in equipments based in PC in harsh environments, we have build our products to guarantee that they will last until long after other IPC will not.

Front Bezel IP65 Panel PC

Industrial Panel Touch PC with an integrated fanless CPU, panelable and with an IP65 frontal water and dust resistant.

CPU motherboards with next generation Intel processors, fanless and high efficiency, with exceptional performance.

Anodized aluminium or stainless steel, with a sealing to reach the IP65 of the equipment.

5-wires resistive touch screen, or capacitive projected multitouch

Full IP65 Panel PC

Stainless steel Industrial Panel Touch PC with both integrated fanless CPU and an IP65 protection against water and dust in all six sides.

CPU motherboards with next generation Intel processors, fanless and high efficiency, with exceptional performance.

Selection and setting of up to five ports, including COM ports (serial), USB or ethernet, through IP68 connectors.

5-wires resistive touch screen, or capacitive projected multitouch sensor.

Close Frame Panel PC

Industrial Panel Touch PC integrated fanless CPU, compatible with VESA support.

CPU motherboards with next generation Intel processors, fanless and high efficiency, with exceptional performance.

5-wires resistive touch screen, or capacitive projected multitouch sensor.

Product for markets with very competitive prices.

Industrial Monitor

Industrial Panel Touch Monitor, panelable and with an IP65 frontal water and dust resistant.

5-wires resistive touch screen, or capacitive projected multitouch.

Anodized aluminium or stainless steel frontal, with a sealing to reach the IP65 of the equipment.

Available standard video ports VGA, DVI and HDMI optional.
